

What is an Advance Directive?

A legal document that makes your healthcare treatment choices clear to your loved ones and doctors, if you are unable to speak for yourself.

Includes decision like:

- Picking your Healthcare Proxy, a person who will be speaking on your behalf.
- Selecting healthcare treatments you want or do not want.
- Deciding if you want to donate your organs

Discuss. Decide. Document.

Stay in control of your healthcare treatment when it matters most.

The partner in Advance Care Planning for you and your doctor.

Why should every adult record their future health treatment choices?

1. For You

Losing the ability to speak for yourself is something we never want to think about. Making a plan now ensures you get the care you want.

2. For Better Care

In an event of a health crisis, your loved ones may need to speak for you. Give them clear directions.

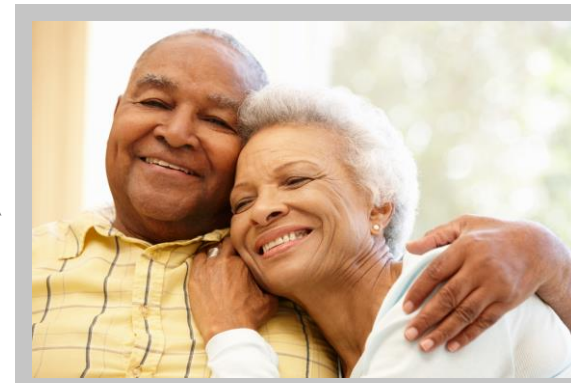

3. For Your Loved Ones

Give your loved ones peace of mind. Don't leave them to make hard decisions on their own.

Provide your loved ones with direction and peace of mind.

Prepare them with answers to questions like:

- ✓ Do I want care at home, or in a facility?
- ✓ Do I want life support?

How do I get started with Eternally?

- ✓ Ask your doctor to refer you to Eternally
- ✓ Eternally will help you schedule an appointment time that works best for you
- ✓ Talk about your future health treatment choices with a licensed clinician by phone or video

"I had this visit from my couch, it took less than an hour, and it was covered by Medicare"

"The conversation was emotional, but my provider made sure I understood each step of the way."
